Practical Research 2 • Grade 12 • Term 2

Writing the Summary, Conclusion and Recommendations

Name: _____ Grade & Section: _____

Date: _____ Score: _____ / 10

Here's a worked sample followed by a practice set. All the numbers and results are made up for teaching.

Part A • SAMPLE OUTPUT (worked example)

Note: The numbers and results below are sample data for practice. They are made up for teaching.

Title: Study Habits and Academic Performance of Grade 12 Students at Bago National High School

Statement of the Problem

1. What are the study habits of Grade 12 students in terms of study time and study place?
2. What is the academic performance of Grade 12 students?

Findings

1. Of the 40 respondents, 26 (65%) study less than 1 hour a day, and 14 (35%) study 1 hour or more. Also, 28 (70%) study in the living room with the TV or other people around, and 12 (30%) study in a quiet room.
2. Of the 40 respondents, 6 (15%) got "Outstanding" (90–100), 12 (30%) "Very Satisfactory" (85–89), 16 (40%) "Satisfactory" (80–84) and 6 (15%) "Fairly Satisfactory" (75–79).

Summary

The study looked at the study habits and academic performance of 40 Grade 12 students at Bago National High School. Most of them study less than 1 hour a day (65%) and study in a noisy place like the living room (70%). For grades, most got Satisfactory (40%) or Very Satisfactory (30%), and only 15% got Outstanding.

Conclusion

1. Most Grade 12 students don't have good study habits, because they study for a short time and in noisy places.
2. Most Grade 12 students have average academic performance, and only a few reach the Outstanding level.

Recommendations

1. Students may set at least 1 hour of study time every day and find a quiet corner at home.
2. Parents may give their children a quiet study space and limit TV time during study hours.
3. Teachers may teach study skills and give short daily review tasks.
4. Future researchers may study the same topic with more respondents or in other schools.

Part B • PRACTICE (students' turn)

Title: Use of Mobile Phones and Sleeping Time of Grade 12 Students at Bago National High School

Statement of the Problem

1. How many hours a day do Grade 12 students spend on their mobile phones?
2. How many hours do Grade 12 students sleep at night?

Findings

1. Of the 40 respondents, 4 (10%) use their mobile phones less than 2 hours a day, 12 (30%) use them 2–4 hours, and 24 (60%) use them more than 4 hours.
2. Of the 40 respondents, 22 (55%) sleep less than 6 hours at night, 14 (35%) sleep 6–7 hours, and 4 (10%) sleep 8 hours or more.

Task: Using the findings above, write the following.

Summary: in 3–4 sentences, restate the topic, the respondents, and the main result for each SOP.

Conclusion: one conclusion for each SOP (2 in all). Say what the result means, and don't repeat the numbers.

Recommendations: at least 3, for students, parents or teachers, and future researchers.

Frames to help:

Summary: "The study looked at ___. Most of the respondents ___."
Conclusion: "Therefore, most Grade 12 students ___."
Recommendation: "Students/Parents/Teachers may ___."

Your answers *(Write on the lines below.)*

Summary

The study looked at

Conclusion 1 *(for SOP 1)*

Therefore, most Grade 12 students

Conclusion 2 *(for SOP 2)*

Therefore, most Grade 12 students

Recommendations *(Write at least 3. You may add a fourth.)*

1. *Students may*

2. *Parents may*

3. *Teachers may*

4. *Future researchers may*

Self-check *(Tick a box if you did the item.)*

- ☐ My summary restates the topic, the respondents, and the main result for each SOP, in 3–4 sentences.
- ☐ My conclusions say what the results mean, and they do not repeat the numbers.
- ☐ I wrote at least 3 recommendations, for students, parents or teachers, and future researchers.
