BAGO NATIONAL HIGH SCHOOL – Brgy. Bago, Roxas City
Senior High School · Grade 12 · Practical Research 2

STUDENT HANDOUT (Week 9 · Nov 9–13, 2026)

Chapter V: Summary of Findings, Conclusions, and Recommendations

Competencies: CS_RS12-IIh-j-1 Draws conclusions from research findings · CS_RS12-IIh-j-2 Formulates recommendations

Home study note (ADM)
Estimated time: about 25–35 minutes (estimate only; no deadline). You also have other subjects — work at a steady pace.
Work indoors in a cool place. Drink water and rest if you feel hot. No outdoor activity is needed.
Paper or notebook is enough. No internet and no online upload are required. Keep your work and follow your teacher's instructions on how to submit it.

1. Lesson notes: Chapter IV vs Chapter V

Chapter IV presents the results (tables) and the discussion (what the numbers mean and the implications). **Chapter V** is shorter. It has three parts:

• **Summary of Findings** – a short numbered list of what the data show (not a second discussion).
• **Conclusions** – answers to the Statement of the Problem (SOP), or the decision on the hypothesis (Ho). No new numbers.
• **Recommendations** – who should do what, based on a named conclusion. Keep them realistic for Bago NHS / Roxas City.

2. Key terms

Finding – One clear statement of a result from the table (mean, SD, verbal interpretation, or highest/lowest item).

Conclusion – A statement that answers the SOP (or decides on Ho) using only the findings.

Recommendation – A concrete action that grows from a conclusion; names who and what.

Signal phrase – Starter words such as "Based on the findings…" or "It is recommended that…"

Largest group – The item or category with the highest mean or percentage (not always a majority).

3. Worked example (SAMPLE DATA – study hours)

Table B. Study Hours per Day of Grade 12 Learners at Bago NHS [SAMPLE DATA for practice only, n = 40]

Study hours per day	Frequency (f)	Percentage (%)
Less than 1 hour	6	15%
1–2 hours	18	45%
3–4 hours	12	30%
More than 4 hours	4	10%

Sample SOP: How many hours do Grade 12 learners at Bago NHS usually study each day?

A. Summary of Findings (model)

Finding 1. The largest group of respondents (45%) study 1–2 hours per day.
Finding 2. The next group (30%) study 3–4 hours per day.
Finding 3. The smallest group (10%) study more than 4 hours per day; 15% study less than 1 hour.

B. Conclusion (model)

Based on the findings, the largest group of Grade 12 respondents at Bago NHS study for a moderate time each day (1–2 hours), and only a small group study more than 4 hours.

C. Recommendation (model)

It is recommended that advisers remind learners during Homeroom Guidance to keep a simple study plan of at least 1–2 hours on school nights, and that parents help protect that quiet study time at home.

4. How to write each part (quick steps)

Findings: Start with the overall picture or the largest / smallest groups. Keep each finding to 1–2 sentences. Use only numbers in the table.

Conclusions: Answer the SOP. Start with “Based on the findings…” or “It can be concluded that…”. Do not invent new means or p-values. Do not put recommendations here.

Recommendations: Grow from a named conclusion. Name **who** (learners, advisers, parents, the school) and **what** they should do. Keep it feasible in Roxas City. Start with “It is recommended that…”.

5. Practice (do these on paper — no answer key in this handout)

Table C. Causes of Being Late to the 7:30 AM Class [SAMPLE DATA for practice only, n = 40]

Overall mean of causes = 3.12 (Sometimes). Top 3 highest causes: phone use until late at night (M = 4.32, Always); long wait for a tricycle/jeepney (M = 4.05, Often); household chores before leaving (M = 3.88, Often). Top 3 lowest: family fishing/farm work early morning (M = 1.95, Rarely); low motivation for 7:30 AM class (M = 2.18, Rarely); living far from school (M = 2.40, Rarely).

Sample SOP for Table C: What are the common causes of tardiness among Grade 12 learners at Bago NHS?

Practice 1. Write Finding 1 and Finding 2 from Table C (overall mean; top 3 highest causes).

_____

_____

Practice 2. Write one conclusion that answers the sample SOP. Start with “Based on the findings…”.

_____

_____

Practice 3. Write one recommendation that grows from your conclusion. Name who and what.

_____

_____

Checklist before you stop: ☐ Findings use only table numbers ☐ Conclusion answers the SOP ☐ Recommendation names who + what ☐ Signal phrases are used
