Sketch and Fill: The Normal Curve

November 12, 2026

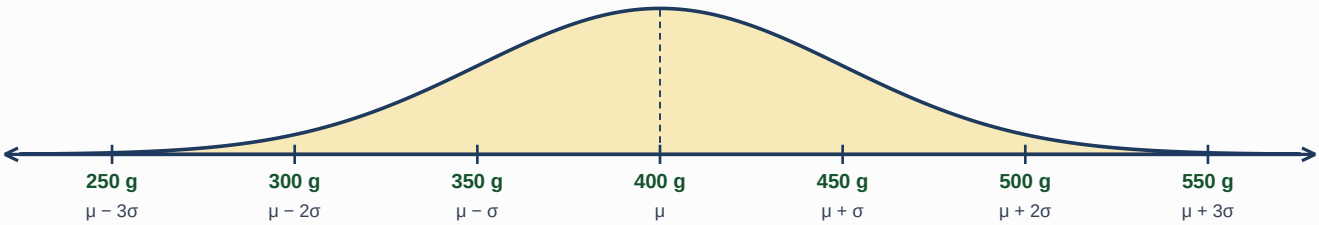

Name: _____ **Section:** _____ **Date:** _____

Directions

Study the worked example (from today's class, "We Do: Sketch the Bangus Curve"). Then complete Items 1 to 3.
For each item: (a) sketch the normal curve on the axis and label the 7 tick marks with their values; (b) fill out the 7 computation boxes; (c) complete the sentence using the 68-95-99.7 (empirical) rule.
Empirical rule: about 68% of the values fall in μ ± σ, about 95% fall in μ ± 2σ, and about 99.7% fall in μ ± 3σ.
Show the computation in every box. You may write on this sheet or on clean paper. No deadline; one submission per learner.

Worked Example — We Do: Sketch the Bangus Curve (filled for you)

Weights of bangus from one harvest are normal with μ = 400 g and σ = 50 g. The 7 tick marks are μ − 3σ to μ + 3σ.

μ − 3σ	μ − 2σ	μ − σ	μ	μ + σ	μ + 2σ	μ + 3σ
400 − 150	400 − 100	400 − 50	400	400 + 50	400 + 100	400 + 150
= 250 g	**= 300 g**	**= 350 g**	**= 400 g**	**= 450 g**	**= 500 g**	**= 550 g**

So: about 95% weigh between 300 and 500 g (μ ± 2σ).

Item 1

μ = 35 points σ = 5 points

Scores on a 50-item General Mathematics quiz of Grade 11 learners at Bago National High School are approximately normal with μ = 35 points and σ = 5 points.

Sketch the normal curve in this space

μ − 3σ	μ − 2σ	μ − σ	μ	μ + σ	μ + 2σ	μ + 3σ
_____ − _____	_____ − _____	_____ − _____	_____	_____ + _____	_____ + _____	_____ + _____
= _____	= _____	= _____	= _____	= _____	= _____	= _____

About _____ % of the scores fall between _____ and _____ points (μ ± σ).

Sketch and Fill: The Normal Curve

November 12, 2026

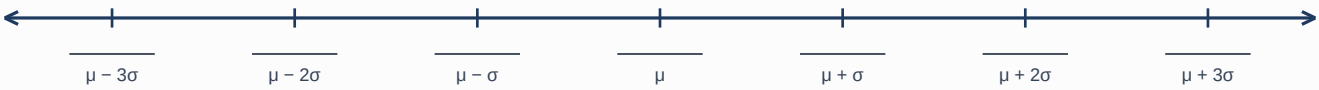

Continue Items 2 and 3. Use the same steps as the worked example on page 1.

Item 2

μ = 160 cm σ = 5 cm

Heights of Grade 11 learners at Bago National High School, Roxas City, are approximately normal with μ = 160 cm and σ = 5 cm.

Sketch the normal curve in this space

μ − 3σ	μ − 2σ	μ − σ	μ	μ + σ	μ + 2σ	μ + 3σ
_____ − _____	_____ − _____	_____ − _____	_____	_____ + _____	_____ + _____	_____ + _____
= _____	= _____	= _____	= _____	= _____	= _____	= _____

About _____ % of the learners have heights between _____ and _____ cm (μ ± 2σ).

Item 3

μ = 80 kg σ = 10 kg

Daily talaba (oyster) harvests at a fish landing in Roxas City are approximately normal with μ = 80 kg and σ = 10 kg.

Sketch the normal curve in this space

μ − 3σ	μ − 2σ	μ − σ	μ	μ + σ	μ + 2σ	μ + 3σ
_____ − _____	_____ − _____	_____ − _____	_____	_____ + _____	_____ + _____	_____ + _____
= _____	= _____	= _____	= _____	= _____	= _____	= _____

About _____ % of the daily harvests fall between _____ and _____ kg (μ ± 3σ).
